

DAY TRADING VS. LONG-TERM HODLING

HODLING

HODLING IS A TYPO OF THE WORD "HOLD" USED ON A BITCOIN FORUM AND IS USED TO DESCRIBE THE ACT OF HOLDING ONTO CRYPTO ASSETS RATHER THAN SELLING IT. HODL BECAME A MEAN AND HAS MORPHED INTO THE MEANING HOLD ON FOR DEAL LIFE.

Characteristics of Day Trading

- Can be risky and requires strategy
- High potential for profitability
- Crypto day trading is relatively new
- Can take time to keep on top of the current trends
- Higher market volatility means understanding fluctuations will lead to success or failure
- The market is available 24/7

Characteristics of Long-Term Hodling

- Return exponential gains
- Less time consuming
- Favorable tax treatment
- Large cost attached to it
- Takes time to see growth
- Market crashes can cause a loss of most or all gains
- Wild price swings
- Requires a strategy and research on what crypto is right for you.

EXAMPLES OF HODLING

An example of Hodling that is making recent headlines:

A Dogecoin wallet reawakens to 30,000% gains after 9-years of dormancy.

According to an article on The Daily Hodl, the wallet unloaded 2,043,137 DOGE and pocketed exponential gains.

While the intentions of the wallet owner are not really known, speculations are that the wallet owner acquired these tokens back in 2013, at a very low price per token.

Holding these tokens through the "cryptocrash" or dead days of crypto and keeping the wallet dormant increased the value 30.838.2% in the last 9 years.

This users now holds more than \$1.31 milion worth of Dogecoin, per the Blockchain data.
